ABOUT ICON CIRCUITS

Icon Circuits is a technology-driven PCB design company built on the principles of innovation, quality, and engineering excellence. We deliver reliable and efficient PCB design solutions to a wide range of industries, supporting customers from concept development to final production.

With extensive experience in PCB design and manufacturing, our team combines deep technical expertise with modern engineering practices to create robust, high-performance designs. We focus on precision, reliability, and manufacturability, ensuring every solution meets industry standards and customer expectations.

At Icon Circuits, collaboration is central to our approach. We work closely with our clients to understand their technical requirements and business goals, enabling us to deliver tailored solutions that add long-term value. As technology continues to evolve, we remain committed to innovation and continuous improvement, providing future-ready PCB design services that drive progress and build lasting partnerships.

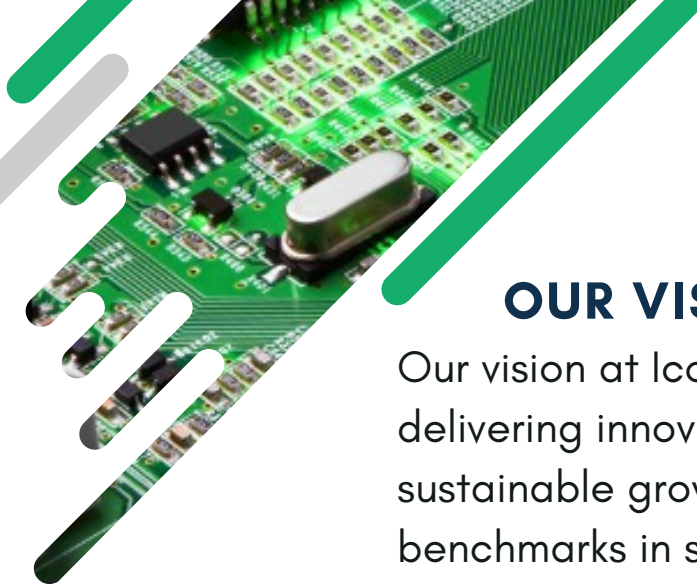

OUR TEAM

At Icon Circuits,, our success is driven by the strength of our people. Our multidisciplinary team of engineers, designers, and industry specialists brings extensive experience and technical expertise across both design and manufacturing. Working with a shared focus on quality, collaboration, and measurable results, we deliver innovative and dependable solutions. Through continuous improvement and teamwork, we ensure excellence in every project we execute.

OUR GOALS

At Icon Circuits, we aim to be a trusted and forward-thinking technology partner, delivering innovative and client-focused PCB design solutions that drive sustainable growth and create meaningful impact. Guided by an unwavering commitment to quality, adaptability, and integrity, we strive to set new benchmarks in PCB design and engineering excellence. Through strategic collaboration and deep technical expertise, we work closely with our clients to address complex challenges, deliver reliable and future-ready solutions, and create enduring value that supports long-term success.

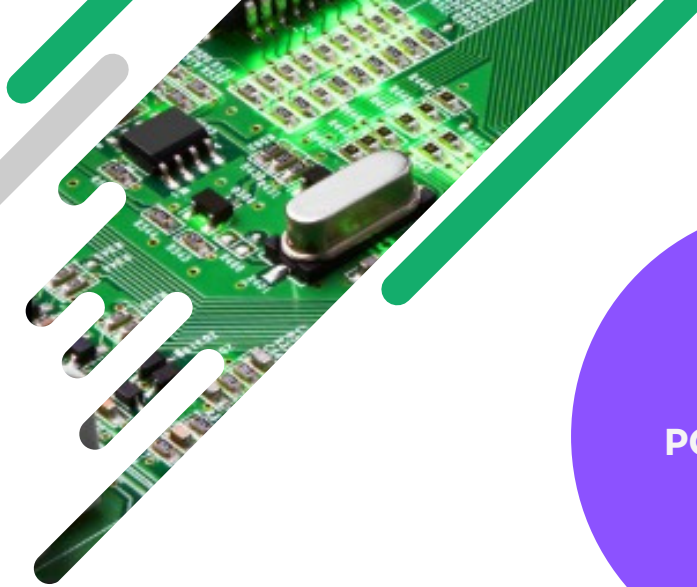

OUR VISION

Our vision at Icon Circuits is to be a trusted and forward-thinking partner, delivering innovative and client-focused PCB design solutions that foster sustainable growth and create meaningful impact. We strive to set new benchmarks in service excellence through our unwavering commitment to quality, adaptability, and integrity, empowering our clients to thrive through strategic collaboration, deep technical expertise, and the creation of enduring value.

OUR MISSION

At Icon Circuits, our mission is to deliver exceptional, technology-driven PCB design and PCB solutions powered by deep technical expertise, proven reliability, and a strong focus on client-centric innovation. We are committed to building strategic, long-term partnerships by understanding each client's unique goals and challenges, and aligning our advanced engineering capabilities to deliver meaningful, measurable results.

PCB DESIGN

Icon Circuits delivers professional PCB design services that transform concepts into production-ready layouts. We work from customer-provided schematics, BOMs, or ECAD files to develop high-performance, manufacturable designs optimized for reliability, cost, and scalability.

- Design Capabilities
- Schematic Review & BOM Validation
- PC-Compliant Footprints & Land Patterns
- Mechanical Integration & Stack-Up Definition
- Component Placement Optimization
- High-Speed & Controlled-Impedance Routing
- Advanced Design Expertise
- High-Speed Digital & Controlled-Impedance Designs
- Power Supply & High-Power PCB Designs
- Analog, Digital & Mixed-Signal Boards
- RF, Wireless & IoT Product Designs
- Backplanes & Daughter Card Architectures
- Design Quality & Manufacturing Readiness
- Design Rule Check (DRC) & Electrical Rule Check (ERC)
- Design for Manufacturing (DFM), Assembly (DFA) & Test (DFT)
- EMI/EMC-Focused Layout Practices
- Complete Fabrication & Assembly Documentation
- Comprehensive Gerber & Netlist Review

From concept to production, Icon Circuits delivers precise, reliable, and future-ready PCB designs engineered for performance and manufacturability.

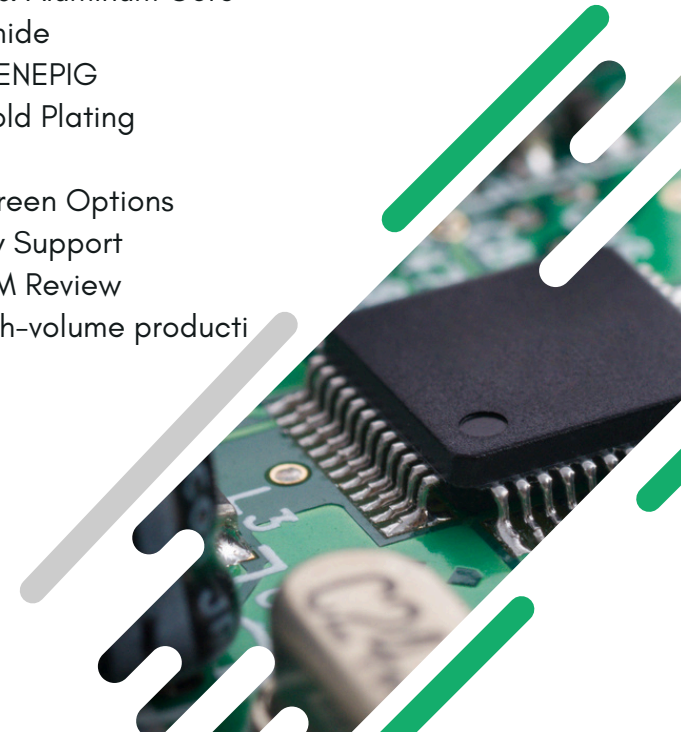

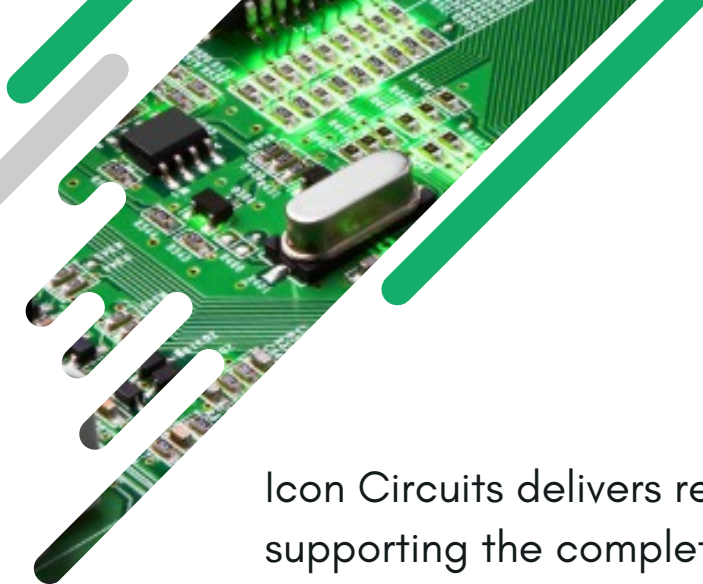

PCB FABRICATION SERVICES

Icon Circuits provides advanced PCB fabrication services designed to support modern electronic products from prototype to volume production. We deliver high-quality, cost-effective printed circuit boards with strict process control, fast turnaround, and reliable on-time delivery—making us a trusted fabrication partner for diverse industries.

- Fabrication Capabilities
- Rigid PCBs: 1-30 Layers
- MCPCBs: 1-4 Layers
- Flexible PCBs: 1-8 Layers
- Rigid-Flex PCBs: 2-20 Layers
- HDI PCBs: 1-N-1, 2-N-2, 3-N-3 Stack-ups
- Advanced Features
- Controlled Impedance
- Blind & Buried Vias
- Via-in-Pad (Filled & Capped)
- Heavy Copper, Edge Plating
- Plated Half-Holes, Slots & Cutouts
- Materials & Finishes
- FR-4, Halogen-Free, Copper & Aluminum Core
- Ceramic, PTFE, Rogers, Polyimide
- Lead-Free HASL, OSP, ENIG, ENEPIG
- Hard/Soft Gold, Selective Gold Plating
- Quality & Reliability
- Multiple Solder Mask & Silkscreen Options
- EMI Shielding Film & Coverlay Support
- Comprehensive Gerber & DFM Review
- From rapid prototyping to high-volume production

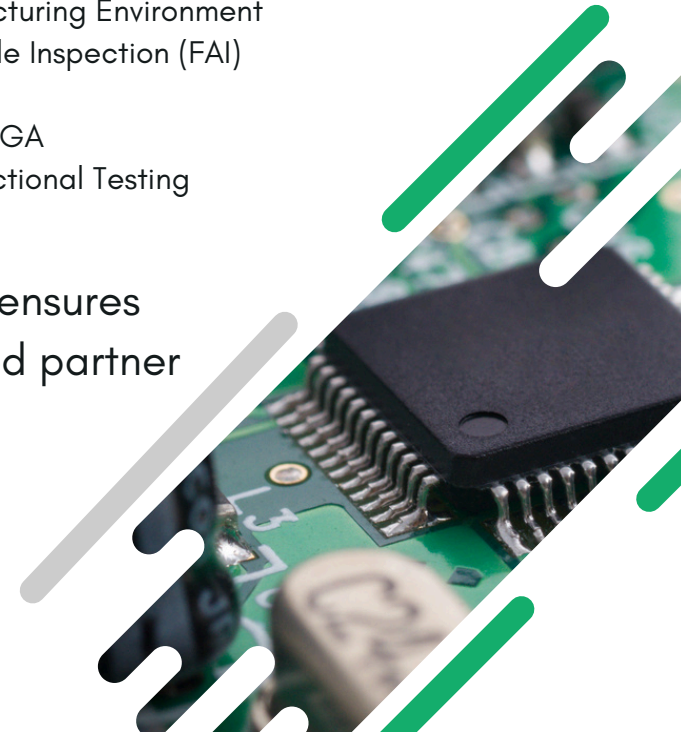

PCB ASSEMBLY SERVICES

Icon Circuits delivers reliable, high-quality PCB assembly services in India, supporting the complete product lifecycle from prototyping to high-volume production. We specialize in SMT, Through-Hole (THT), Mixed Technology, BGA, and Micro-BGA (μ BGA) assemblies, offering scalable solutions for both low-quantity builds and large production runs.

- Assembly Capabilities
- RoHS / Lead-Free PCB Assembly
- SMT, THT & Mixed-Technology Assembly
- BGA & μ BGA Assembly
- Rigid & Flexible PCB Assembly
- Cable, Wire Harness & Mechanical Assembly
- Manufacturing & Quality
- High-Mix, High-Density Assembly Expertise
- Fully ESD-Compliant Manufacturing Environment
- Visual Inspection & First Article Inspection (FAI)
- AOI, 3D AOI & 3D SPI
- X-Ray Inspection for BGA/ μ BGA
- In-Circuit Testing (ICT) & Functional Testing

From rapid prototypes to full-scale production, Icon Circuits ensures precision, reliability, and on-time delivery—making us a trusted partner for your PCB assembly needs.

COMPONENT SOURCING

Icon Circuits provides reliable global electronic component sourcing to support seamless PCB manufacturing from design to delivery we ensure timely availability of high-quality components sourced exclusively from authorized and reputable distributors.

Our experienced sourcing team delivers competitive pricing, fast quotations, and alternate part solutions to address BOM shortages, long lead times, and obsolescence challenges—ensuring uninterrupted production and consistent quality.

- Sourcing Advantages
- Authorized & Traceable Component Supply
- Competitive Pricing & Cost Optimization
- Fast Quotations & Short Procurement Lead Times
- Alternate Part Identification for BOM Shortages
- Full Traceability & Obsolescence Management
- Dedicated Professional Customer Support
- Tailored Component Sourcing Solutions
- Our Sourcing Process
- BOM Upload
- BOM Analysis & Processing
- Multi-Vendor Data Aggregation
- Price & Lead-Time Optimization
- Detailed Sourcing Report Generation
